

# BUCS Outdoor Championships Entry Criteria

Due to the large numbers of entries to recent Outdoor Championships causing a very late running event, the Sports Management Group have reluctantly decided to introduce a minimum standard for archers attending the Outdoor Championships. This standard is not designed to exclude people but just to ensure that all competitors are suitably prepared for the event.

The entry form will require all archers to list an appropriate score that they have already shot to demonstrate that they will be able to cope with the event. Scores must have been shot in a competition, be of an appropriate round (see below), meet the qualification score and be shot on the bow style to be shot at the Outdoor Championships. The score must have been shot since the last Outdoor Championships and will include the scores at that event, so many archers will already have qualified.

Qualification scores have been set at second class for entries to the championship category and second class for under 18s for entries to the trophy (novice) category, although for longbows this is third class and third class for under 18s respectively. The qualification rounds are any nine or twelve dozen round containing the longest distance to be shot at the Outdoor Championships, or the equivalent imperial distance.

If members of your club are finding it difficult to shoot an appropriate competition then please contact the Sports Management Group at the earliest opportunity. We don't wish to exclude anyone who could meet the scores and therefore may be able to make alternative arrangements for clubs who are having problems. In particular, good scores on similar rounds or a club target day may be allowed, however, you must contact the SMG to arrange this in advance.

In addition to the main qualifying scores, an exception to the 'longest distance' requirement has been made for those who competed in the trophy category at the previous Outdoor Championships. Those meeting the full 2nd class score on the appropriate trophy round will also qualify. The relevant scores are:

| Round     | Recurve | Compound | Barebow | Longbow |
|-----------|---------|----------|---------|---------|
| Metric I  | 817     | 1092     | 391     | 171     |
| Metric II | 738     | 959      | 306     | 101     |

On the following two pages is the complete list of qualifying rounds and the required scores for each category, taken from the GNAS Shooting Admin Procedures.
